Vetri Vikaas Matric.Hr.Sec.School
Secondary School Education
2017-2018 — **Percentage-82.2**

Projects **Automated weather classification using Transfer learning.**
This is a team project for naan mudalvan course.
In this project we are classifying various types of weather. These weathers are majorly classified into 5 categories namely Cloudy, Shine, Rain, Foggy, Sunrise.
Transfer learning has become one of the most common techniques that has achieved better performance in many areas, especially in image analysis and classification.Mainly we used Open CV it is camera controlled and also compared photos in dataset.Using Open CV gives interaction between human and computer. In this project we improved the accuracy of weather classification.

Creating webpage using HTML and CSS.
This project is to create my own interest.

Achievements & Awards I have completed my internship at Edustation(Python with Machine learning).
I have completed my internship at eduCBA(Python).
I did my paper presentation in other colleges.
